**The people who made this want other locations and they want to help us in our vision!**

**Let's Do It Here!**

**We have people who can design a professional permaculture food forest, who can help build any structures, who can evaluate the land, who can help provide labor.**

## **My Vision Is To Create What The World Needs & What The World Is Missing**

In a location local to Trinity, Odessa and Keystone. This would make it a special hotspot local to Tampa, and a place protected from Hurricanes.

To also reach the youth, my generation. To share what they weren't taught, to feel nature, to empower them and provide a social environment.

Now is the best time to get on this trend and help people get prepared for the future.
